## **CLAIMS 1-139 ARE PRESENTED FOR EXAMINATION**

### **DETAILED ACTION**

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 135-139, drawn to pharmaceutical compositions,
- II. Claims 18-44 drawn to methods of treating neoplasia;
- III. Claims 45-68, drawn to methods of treating viral infection;
- IV. Claims 69-90, drawn to methods of treating parasite infections;
- V. Claims 91-111 drawn to methods of treating bacterial infections;
- VI. Claims 112-130 drawn to methods of treating a patient for suppression of immune response rejection in tissue transplants; and
- VII. Claims 131-134 drawn to methods of endowing a chemotherapeutic agent with substantially enhanced therapeutic efficacy and reduced toxicity.

Inventions of Groups II to VII and Group I are related as process (method) and apparatus (compositions) for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the methods of treating the various medical disorders can be effected by various processes using different pharmaceutical compositions.

Inventions Groups II to VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different

Art Unit: 1617

modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the medical disorders of set forth in the various claims have different effects, i.e., the treatment of different diseases. The treatment of neoplasia would be different than the treatment of parasite infection.

A burden will also be placed upon the examiner since the medical journals necessary to be searched for each disorder would be astronomical.

Applicant is advised that the response to this requirement to be complete must include an election of the invention **of from any one of Groups I to VII** to be examined even though the requirement be traversed (37 CFR 1.143).

Further restriction may be possible.

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Theodore J. Criares can be reached on 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-6897 for regular communications and N/A for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1235.
